

GETTING STARTED IN STEAMBeyond

From the **MVPvets Community**, click on **TRAINING**

Click on the **STEAMbeyond START EXPLORING** button in the Training Launch Portal

From the STEAMbeyond **MEMBERS > WELCOME** page, select **“MY STYLE”**

Select **STEAM Style Profile** from the 3 interactive assessments and **Take the Assessment** (about 5 minutes)

When finished, scroll down to **view Your STEAM Style** and its related information. It will be one of the following:

- Making Things Work
- Helping People Live Healthier
- Protecting the Planet
- Telling Stories through Digital Art

Your Style category is not a label, it is merely a *jumpstart* to your discovery.

Download and Print Your Report

Now that you know your *STEAM Style*, click the **GO TO CAREER LABS** button to return to STEAMbeyond. Select your STEAM Style on the Career Labs page to explore sample industries, jobs, salaries and college programs that might be of interest to you

GO TO CAREER LABS

Click on the **GO TO CAREER LABS** button to return to STEAMbeyond

On the **CAREER LABS** page, select **YOUR STYLE** based on your assessment results.

Review the different Industries and select one to explore.

When viewing an Industry, there are multiple Topics you can select:

- Mentor Insight
- Industry Snapshot
- Company Spotlight
- Career Examples
- Colleges

Note: Our goal is to add new Career labs every couple of weeks, with announcements being made in an outgoing MVP newsletter

We also recommend exploring the STEAM**beyond NEWS** page. We post several news items each week, and this is a great way to stay abreast of what's happening out there when it comes to both topic and potential career opportunities.

In the STEAMbeyond Menu, click on **MEMBERS > CAREER LABS > ASK A MENTOR**

This is where you can ask questions related to your professional career exploration and development. Questions are forwarded to subject matter experts with responses highlighted on the site.

Ask a Mentor

Mentors bring a wealth of knowledge and experience. Their insight can help you with skill building, career transition, landing a job offer, or any other topic you would like to learn more about. Browse the archives below, or ask your own question of a Mentor, to get those answers!

ASK A MENTOR

Have a question for a mentor? Send it to us. We'll post both your question and the answers received from our guest mentors.

MENTOR QUESTION ARCHIVES

I'm not a great speller, but do I really need to be if I'm going to be an engineer?

Whether you're aiming to be an engineer or a zookeeper, there's virtue in taking the time to write your messaging correctly and spell check. This is especially true when you are looking for a job. If your cover letter, resume, or LinkedIn summary contain spelling errors, the probability is high that recruiters will simply "pass" and move to the next candidate. Why? Because failure to proofread your own important documents translates to you're not going to pay attention to the details which are important to my company. There's no excuse for failing to proofread. None.

How to avoid this pitfall? Always get a second (even third) set of eyeballs on your key messaging. Don't just ask others to look for spelling errors, but also have them check for correct grammar, sentence structure and flow.

Want to learn more about important tips when writing, either for your resume or in emails? Go to our online training partner, the LifeCollaborative, and look for the following courses "Revamp Your Resume" and "Say It Smart in Emails!"

Return to the **MVPvets Community** and click **TRAINING > LIFECOLLABORATIVE**

The LifeCollaborative is a "sister program" providing you with short online lessons addressing important topics under the umbrella of working in a life science environment. 100+ courses (some technical, but most business-oriented) can be found in the course catalog. You can even earn "certificates" – a type of "micro-credentialing" that can be added to your resume.
